

Thank you for using Syteca!

Syteca Application Credentials Broker (ACB) is a stand-alone component of Syteca. This REST API integration tool is designed to allow customers to **securely (with access token rotation) get PAM secrets data for applications, without needing to log in to the Management Tool**, in order to use for their own business purposes.

Information about how to use the **Application Credentials Broker (ACB)** application and the ACB API is included in Syteca's online [Knowledge Base of End-User Documentation](#):

- [Syteca Application Credentials Broker \(ACB\)](#)
- [Password Management](#)
